sharp: $K < \lambda_1$ (Theorem 5.2)
HS: $K < \mathcal{H}_1^{-1/2}$ (Corollary 5.3)
Banach: $K < \mathcal{V}_1^{-1}$ [5]
HS on $1 < \gamma < 3/2$ (outside the range of [6])
Example 6.1
(a) Full range $1 < \gamma \leq 2$
(b) Enlargement near Example 6.1
Lipschitz constant K
γ
$\gamma = 3/2$
(b)
Example 6.1: $(\gamma, K_*) = (5/4, 4.8)$
HS & sharp
sharp only
all three
